## Experience

**Software Engineering Intern** February 2026 – May 2026
*Traincape Technology* *New Delhi, India*

- Built backend services for a SaaS CRM platform using Java and Spring Boot.
- Developed REST APIs with PostgreSQL and implemented authentication using Spring Security and BCrypt.
- Automated scheduled jobs and integrated Firebase for real-time notifications.
- Containerized services with Docker and deployed them on AWS EC2 using S3 and Amplify.
- Implemented CI/CD pipelines with GitHub Actions for automated PR validation.

**Full Stack Intern** December 2025 – February 2026
*Webisdom* *Remote*

- Built and maintained production web applications using MERN/PERN stacks.
- Implemented RBAC, optimized data exports, and delivered requested platform features.
- Deployed applications on AWS EC2 and Amplify while resolving infrastructure issues.
- Addressed VAPT findings through rate limiting, validation, and secure access controls.

## Projects

**The Blog Zone** | *Node.js, Express, PostgreSQL, Next.js, Supabase, Groq AI*

- Built a full-stack blogging platform featuring JWT authentication, rich text editing, image uploads, optional email-based account recovery with OTP verification, and AI-assisted writing powered by Groq AI.
- Designed secure private blogging with server-side AES encryption, ensuring only authors can decrypt and access their private posts while preserving user privacy.
- Engineered infinitely nested discussions using PostgreSQL's Adjacency List model, implemented full-text search across posts and authors, and migrated the backend from MongoDB to PostgreSQL with a scalable relational schema.
- Developed a dedicated admin dashboard with isolated JWT authentication, enabling user moderation, account banning, content management, and secure platform administration.

**TeamVault** | *Java, Spring Boot, JPA/Hibernate, PostgreSQL, Next.js, TypeScript, Docker*

- Built a collaborative knowledge management platform for project documentation and organizational knowledge sharing.
- Implemented JWT authentication, RBAC, and Spring Security with project-level permissions and member invitations.
- Engineered immutable article revision history with automatic checkpoints, visual line-by-line diffs, historical previews, and RBAC-protected rollback.
- Designed relational data models with JPA/Hibernate and containerized the backend with Docker, deploying through GitHub Actions, Render, and Vercel.

**String Sure** | *TypeScript, Node.js, npm*

- Published an open-source npm package for string and email validation.
- Implemented configurable validation rules including length and character constraints.

## Education

**Indira Gandhi National Open University (IGNOU)** New Delhi, India
*Bachelor of Computer Applications* *Expected 2026*

## Technical Skills

**Languages**: Java, TypeScript, JavaScript, SQL, HTML/CSS
**Frameworks**: Spring Boot, Node.js, Express.js, React.js, Next.js
**Databases**: PostgreSQL, MySQL, MongoDB
**Cloud/DevOps**: AWS (EC2, S3, RDS, Amplify), Docker, GitHub Actions, Vercel, Firebase, Linux
**Developer Tools**: Git, GitHub, GitLab
